DETAILED ACTION

Oath/Declaration

Applicant has not given a post office address anywhere in the application papers as required by 37 CFR 1.33(a), which was in effect at the time of filing of the oath or declaration. A statement over applicant's signature providing a complete post office address is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Etienne et al. (US 4,862,088).

Etienne et al. discloses a remote condition sensing of a telecommunication splice case comprising a closure (14) containing a sealed no-power electric sensor (20), and a sensor for sensing humidity and temperature within the closure in which any inundation of moisture into the closure can be detected without opening the closure (col. 1, lines 20-25; col. 2, lines 19-55; col. 7, line 21- col. 9, line 15).

Allowable Subject Matter

Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Eslambolchi et al. (US 5,903,221) is cited to show an additional optical cable moisture detection system.
